datasheet VERISSIMO POUF

General description:

Collection of poufs composed of a cubic aluminium base and a cylindrical seat upholstered in faux leather, conceived as a natural extension of the Verissimo planters, from which it inherits its formal language. Available in two sizes (Ø 730 and Ø 1210 mm) and in five carefully selected finishes, the collection stands out for the contrasting piping detail, which emphasizes the geometry of the seat and adds a subtle visual accent.

Designer: Soraya Pla.
Year of launch: 2026.

Polyester paint.

Consult for special dimensions or any other modification.

Maintenance:**Polyester powder coating:**

For dry dirt (dust), use a cloth dampened with water.

For greasy/oily dirt (fingerprints), use a sponge with water and liquid dish detergent (Vim liquid), then wipe with a cloth dampened with water. Avoid using detergents containing solvents or pure ethyl alcohol.

Faux leather upholstery:

To keep it in good condition, do not place it near direct sources of heat (heaters, fireplaces, exhaust fans).

For regular cleaning, remove dust with a soft cloth or the vacuum cleaner brush; if necessary, use a soft cloth or sponge slightly dampened. Any liquids or other substances that accidentally fall on the faux leather should be removed immediately by gently pressing with a damp sponge until completely gone. Then, pass the damp sponge over the entire area surrounding the stain, always being careful not to press too hard. Never use solvents or alcohol: they can permanently damage the appearance of the faux leather. For particularly stubborn stains, use specific cleaning products.

Sustainability:

The Verissimo collection is committed to sustainability and environmental preservation, which is why it uses responsible materials that minimize our impact on the planet. The aluminum used in the collection is 100% recyclable and contains at least 70% recycled content. This ensures that the products are durable and have a long lifespan, reducing the need for short-term replacement. Additionally, the paints used are solvent-free, water-free, and produce no emissions or waste. The result is a lower environmental impact.
