## datasheet CP10

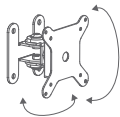

### General description:

CP10 is an articulated wall mount for computer monitors that comply with the VESA75 and VESA100 standards. It is fixed to the wall by means of an H-shaped piece made of steel and bolted.

The simple articulation arm that makes up the support is made of folded steel plate. It has a holder for the monitor in the form of "u" wrapping the end of the arm, through which we get the desired rotational movement to guide the monitor. Next to the piece in the form of "U" the piece of fixation is available to the monitor in the form of a star.

Coating parts, fire retardant polyester paint aluminum, gray, white or black. Other colors consult.

CP10

surface (mm)	dimensions (mm)	maximum charge (kg)
maximun a 23" monitor	115x115x82	20 total

\*Adapters that comply with VESA75 and VESA100 standards are included.

\*\*Wall fastening hardware included.

Finishes:

Consult for special dimensions or any other modification.

Maintenance:-Polyester Paint:

For dry dirt (dust), use a damp cloth. For greasy/oily stains (fingerprints), wipe with a sponge with water and dishwashing liquid. Rinse with a damp cloth. Avoid using products containing solvents and/or pure ethyl alcohol.

-Aluminium-metal-glass-melamine-plastic:

We recommend using normal cleaning products for delicate surfaces. Alcohol, solvents and abrasive agents must be avoided.

Sustainability:

Manufacturing materials are 100% recyclable. The used paints do not contain solvents, do not consume water and do not generate emissions or waste. The result is a lower environmental impact.
