

systemtronic
datasheet PAPER BINS

General description:

Made of aluminum and available in two different sizes, with capacities of 100 and 160 liters (one 50-liter trash bag per compartment).

Designer: Lagranja Design.

Year of launch: 2024.

Technical description:

Materials:

Structure: lacquered aluminum.

Dimensions:

Paper bin M: 500x364x753 mm 19.69x14.33x29.65"

Paper bin L: 750x364x753 mm 29.53x14.33x29.65"

Consult for special dimensions or any other modification.					

*Polyester paint

Maintenance:-Polyester Paint:

For dry dirt (dust), use a damp cloth. For greasy/oily stains (fingerprints), wipe with a sponge with water and dishwashing liquid. Rinse with a damp cloth. Avoid using products containing solvents and/or pure ethyl alcohol.

-Pictogram:

When cleaning the pictograms, avoid excessive rubbing. Clean around them with gentle strokes and avoid applying too much pressure. Do not use abrasive cleaners or strong chemicals that may damage the vinyl material. After cleaning, dry the bin and pictograms with a soft, clean cloth. Ensure there is no moisture left on the surface.

Sustainability:

The Croma collection is committed to sustainability and the preservation of the environment, which is why it uses responsible materials that minimize our impact on the planet. The aluminum used in the collection is 100% recyclable and contains at least 25% recycled material. By using aluminum in our collection, we ensure that items are durable and have a long lifespan, thus reducing the need for short-term replacement. On the other hand, ash wood is a responsible choice due to its renewable origin and its ability to capture and store carbon. Ash is a fast-growing type of wood that is grown sustainably. By using ash wood in our collection we promote the conservation of forests. The incorporated fabrics are composed of 20% recycled fiber. Used paints do not contain solvents, do not consume water and do not generate emissions or discharges. The result is a lower environmental impact.
