

systemtronic  
datasheet S15

### General description:

The S15 is a basic element within the workspaces. It is a 450x350mm non-slip polymeric plate, backed by a metallic structure, composed of 1.5mm thick cold-rolled square tube. The inclination is adjustable in two positions: at 12° and at 17°. It has a test certificate issued by AIDIMA for adaptation to DIN-4556-83 normative "Office furniture. Supports for feet in the workplace. Requirements, measures". The fact of being ergonomically correct is not incompatible with aesthetics, so S15 has a design adaptable to any environment.

Designer: STC Studio.

Technical description:

Material: polymeric plate and metal structure, composed of cold-rolled square tube, 1.5mm thick.

Dimensions: 450x355x135 mm 17.71x13.97x5.31 "

mm · inches

Finishes:

Structure	Plate	
		
satin black RAL 9011	aluminum	black
*Polyester paint		

Version with aluminum plate

Consult for special dimensions or any other modification.

Maintenance:

-Polyester Paint:

For dry dirt (dust), use a damp cloth. For greasy/oily stains (fingerprints), wipe with a sponge with water and dishwashing liquid. Rinse with a damp cloth. Avoid using products containing solvents and/or pure ethyl alcohol.

-Aluminium-metal-glass-melamine-plastic:

We recommend using normal cleaning products for delicate surfaces. Alcohol, solvents and abrasive agents must be avoided.

Sustainability:

The used paints do not contain solvents, do not consume water and do not generate emissions or waste. The result is a lower environmental impact.
